

## Pseudoephedrine Scheduling in the United States as of 22 October 2008

The Roman numerals indicate which state schedule, if any, contains pseudoephedrine, while the citations refer to the code section (ST) or administrative rule (R) under which PSE is scheduled. Note that the legal implications of a given schedule may vary from state to state; states that classify the same substance in the same schedule do not necessarily regulate that substance the same way. Some states that schedule pseudoephedrine also exempt certain forms, such as those in liquid form or those a designated state authority has determined cannot be used to make methamphetamine. You must consult the laws and regulations of a particular state to determine what rules apply to a given schedule. Note, too, that even those states that do not schedule pseudoephedrine may still regulate it as strictly as, or more so than, states that do.

AR ST § 5-64-212	KS ST § 65-4113	MO ST § 195.017	OK ST § 2-212	WI ST § 961.22
ID ST § 37-2707	ME ST tit. 17-A, § 1102	NV R. 453.530	OR ST § 475.973	WV § 60A-2-212
IA ST § 124.212	MN ST § 152.02	NM ST § 30-31-10	WA R. 246-887-150	

<sup>1</sup> Excludes forms “prepared for dispensing or over-the-counter distribution . . . unless such substance is possessed, delivered, or possessed with intent to deliver to another with the intent to manufacture methamphetamine, amphetamine or any other controlled substance in violation of section 37-2732, Idaho Code.”

<sup>2</sup> Excludes drug products approved under federal law for other-the-counter sale.

<sup>3</sup> Excludes “any drug or compound containing Pseudoephedrine ... that [is] prepared for dispensing or over-the-counter distribution and [is] in compliance with the Federal Food, Drug and Cosmetic Act and applicable regulations ....”

<sup>4</sup> Maine designates its four schedules of controlled substances as W, X, Y, and Z.
