VI. GENERIC LANGUAGE

The Advisory Council on the Misuse of Drugs (ACMD), a panel of experts tasked with advising the British government on the regulation and control of substances, has proposed a generic definition for the control of cathinones as follows:

- Any compound (not being bupropion ...) structurally derived from 2-amino-1-phenyl-1-propanone by modification in any of the following ways, that is to say,
- (i) by substitution in the phenyl ring to any extent with alkyl, alkoxy, alkylendioxy, haloalkyl or halide substituents, whether or not further substituted in the phenyl ring by one or more other univalent substituents;
 - (ii) by substitution at the 3-position with an alkyl substituent;
 - (iii) by substitution at the nitrogen atom with alkyl or dialkyl groups, or by inclusion of the nitrogen atom in a cyclic structure.

The following states have bills proposing to add this generic language or a version thereof:

- Arkansas: 2011 AR S.B. 423
- California: 2011 A.B. 486
- Idaho: 2011 ID H.B. 119
- Illinois: 2011 IL H.B. 3486
- Kansas: 2011 KS H.B. 2049
- Louisiana: 2011 LA H.B. 10
- Louisiana: 2011 LA H.B. 12
- Mississippi: 2011 MS S.B. 2226
- Mississippi: 2011 MS H.B. 1205
- New York: 2011 NY A.B. 5456
- North Carolina: 2011 NC S.B. 7
- Texas: 2011 TX H.B. 2118.

VII. NAPHTHYL PYROVALERONE ANALOGS

The ACMD recently provided a report to the British government regarding the naphthyl pyrovalerone analogs of cathinone. Currently, there are three states in the United States that schedule any of the naphthyl pyrovalerone analogs, including naphyrone, or have any proposed

legislation or bills to schedule these drugs. They are: Kentucky (2011 KY H.B. 121 proposes to schedule naphthylprovalerone); Michigan (2011 MI S.B. 259 proposes to schedule naphyrone and pyrovalerone; 2011 MI H.B. 4565 proposes to schedule naphyrone); and Texas (2011 TX H.B. 2118 and 2011 TX S.B. 1423 propose to schedule naphyrone, butylone, pentylone, eutylone, and ethylone plus others). The United States Congress is also proposing to schedule naphyrone, ethcathinone, ethylone and butylone (2011 Cong. US HR 1254).

Please see the ACMD report entitled “Consideration of the naphthylpyrovalerone analogues and related compounds” for more information.
