This table is a compilation of state laws that mention, by name, prescribing or administering naloxone or another opioid antagonist. The table does not include general “Good Samaritan” statutes that encourage a person to assist another person during any emergency and in a voluntary capacity. For information on Good Samaritan laws that specifically address assisting another person during an overdose of an opioid, please refer to NAMSDDL’s document entitled, “Good Samaritan Overdose Prevention Statutes.”

The following are definitions for the headings used in this document:

Professional Immunity: A person acting in his or her professional capacity (*e.g.*, physician or EMT) will not be held liable for **prescribing, dispensing, distributing, or administering naloxone or other opioid antagonist to a layperson.**

Layperson Immunity: A person who does not have professional or specialized knowledge in **dispensing, distributing, or administering naloxone or other opioid antagonist will not be held liable** to someone who is overdosing, if that person administers naloxone **or other opioid antagonist** to the person suffering from the overdose.

Prescription to Third Parties: A healthcare provider may prescribe, dispense, distribute, or administer naloxone or other opioid antagonist to an at-risk person’s family member, friend, or other person in a position to assist the at-risk person in the event of an opioid-related overdose.

		for administering an opioid antagonist, and the first responder's employer, are immune from civil liability for injuries or death associated with the administration of an opioid antagonist.	
TN	Tenn. Code Ann. § 63-1-152	A licensed health care practitioner otherwise authorized to prescribe an opioid antagonist, acting in good faith, and exercising reasonable care may, directly or by standing order, prescribe an opioid antagonist to a person at risk of experiencing an opiate-related overdose. Any licensed healthcare practitioner who prescribes or dispenses an opioid antagonist is immune from professional administrative action and civil liability in the absence of gross negligence or willful misconduct for his or her actions.	A person who receives a prescribed opioid antagonist may administer it to another person if: the person has a good faith belief that the other person is experiencing an opioid related drug overdose; and the person exercises reasonable care in administering the drug to the other person. Any person who administers an opioid antagonist is immune from civil liability in the absence of gross negligence or willful misconduct for his or her actions.
UT	Utah Code Ann. §§ 26-55-101 to 26-55-104 § 58-17b-507 § 58-31b-703 § 58-67-702	A health care provider who is licensed to prescribe or dispense an opiate antagonist may, without a prescriber-patient relationship, prescribe or dispense an opiate	A person who acts in good faith to administer an opiate antagonist to another person whom the person believes to be suffering an opiate-related drug overdose is immune from civil damages for

¹ A state certified EMT may administer naloxone hydrochloride.

² EMS providers may administer naloxone hydrochloride as long as the “route of the administration is within the provider’s scope.”

³ EMTs, paramedics, and cardiac technicians may administer opioid antagonists.

⁴ An advanced or regular EMT, an emergency medical responder, a firefighter or volunteer firefighter, a law enforcement officer, or a paramedic may administer an overdose intervention drug to a person suffering from an overdose; and certain health care providers may prescribe, and a pharmacist may dispense, an overdose intervention drug for an advanced or regular EMT, an emergency medical responder, a fire department or volunteer fire department, a law enforcement agency, or a paramedic.

⁵ A first responder is defined as a peace officer, a firefighter, or an EMS practitioner.

⁶ An advanced EMT, basic EMS person, basic EMT, first responder and EMS person may administer an opioid antagonist as clinically indicated.

⁷ These include, but are not limited to: the authorizing physician or physician's designee; the medical director; the person providing communications services or lawfully operating or utilizing supportive electronic communications devices; the life support agency or an officer, member of the staff, or other employee of the life support agency; the hospital or an officer, member of the staff, nurse, or other employee of the hospital; the authoritative governmental unit or units; and emergency personnel from outside the state.

⁸ The law does not apply if the person who administers the opioid antagonist is a physician, physician's assistant, registered nurse, or licensed practical nurse and the opioid antagonist is administered in a hospital.

⁹ A licensed physician, a licensed advanced practice registered nurse authorized to prescribe drugs, or a licensed physician's assistant authorized to prescribe drugs may authorize the following individuals to administer opiate antagonists: an emergency medical responder; a peace officer; and staff of community-based health disease prevention or social service programs, and these individuals may administer opiate antagonists only if: the licensed physician, licensed physician's assistant, or licensed advanced practice registered nurse has issued a standing order to, or entered into a protocol with, the individual; and the individual has training in the recognition of signs of opiate overdose and the use of opiate antagonists as part of the emergency response to opiate overdose.

¹⁰ A “qualified first responder” is any state and local law enforcement agency staff, fire department personnel, fire district personnel, or licensed emergency medical technician. A qualified first responder shall only administer naloxone by such means as the qualified first responder has received training for the administration of naloxone.

¹¹ With the approval of a medical director, an advanced EMT, while functioning as a member or employee of a licensed advanced life support emergency medical service, may administer naloxone.

¹² This section sets forth the protocol for a pharmacist exercising prescriptive authority for naloxone drug therapy.

¹³ Emergency regulation.

¹⁴ Emergency regulation.

¹⁵ These rules define the protocols and criteria for training on lifesaving treatments for opiate overdose as delineated by the Oregon Health Authority.

¹⁶ A first responder is defined as a law enforcement officer or firefighter who has completed training with an emergency medical services agency.

¹⁷ Every licensed EMT is authorized and permitted to administer Naloxone.

¹⁸ A health care professional means a licensed physician, a physician assistant, an advance practice registered nurse, or a pharmacist.

¹⁹ All EMTs may administer naloxone or another opioid antagonist.
