Introduction

Each state determines by statute or regulation the persons or entities entitled to access or receive information in the prescription monitoring program database in that particular state. This memorandum sets out those states that allow access to or receipt of database information by mental health/substance abuse professionals, peer review committees, and/or quality improvement committees of a hospital. This does not mean that if a particular state is not listed in this memorandum or the accompanying map that these individuals or entities in that state are not allowed access to the information. If such persons fall within the definition of "practitioner" or "health care provider" in the state, he or she may qualify for access to the prescription monitoring program database. The following states either specifically include mental health/ substance abuse professionals, peer review committees, and/or quality improvement committees of a hospital in the list of persons or entities entitled to access or NAMSDL was informed by the administrator of the state prescription monitoring program that such persons or entities are allowed access.
